

Our solution entailed the following features:

- Star schema defined to satisfy defined use and support Oracle ERP functionality
- Oracle ERP Standardization
- 5 Data Marts built using Decision Point Analysis.
- UNSPSC Code Standardisation through use of Zycus Tool
- Vendor Master File
- Adoption of Global Data Standards across all Applications
- Development of Consistent, Repeatable Processes

Business Needs / Issues:

- Six Sigma initiative for Data Quality
- Insight into Spend Landscape Unavailable
- Need for Enterprise-wide classification schema
- Schema flexible to handle future expansion of Global Segments and customizable

Benefits:

- Report/analyze Company buy across all businesses, Regions, Vendors, Commodities and Buyers
- Consolidation and standardization of data from multiple systems
- Leverage additional data provided by non-purchasing systems (Finance, HR, etc..) and acquisitions
- Standardization of reporting and metrics calculation Trend analysis
- Remove manual data gathering/reconciliation for reporting and metrics
